Medicare Advantage Open Enrollment Period

By Rep. Joe Emrick

The Pennsylvania Department of Aging (PDA) is reminding older adults the annual Medicare Advantage Open Enrollment Period runs now through March 31. During this time, beneficiaries who currently have a Medicare Advantage plan can switch to a different plan or to original Medicare. Changes to their enrollment will take effect on the first of the month following the month in which they enroll.

Pennsylvania Medicare Education and Decision Insight (PA MEDI) – the Commonwealth's Medicare counseling program – is available through the 52 local Area Agencies on Aging to help beneficiaries with Medicare questions. Older adults can receive unbiased, no-cost Medicare assistance from trained PA MEDI counselors who can walk them through their options to assist in making informed health insurance decisions that optimize their cost savings and access to health care and benefits.

Medicare Advantage is a Medicare-approved plan from a private company that offers an alternative to original Medicare for health and drug coverage. These "bundled" plans include Part A Hospital Insurance, Part B Medical Insurance and usually Part D Drug Coverage.

PA MEDI counselors do not sell Medicare insurance products, nor do they endorse any insurance company, product or agent. Counselors will not recommend policies, companies or insurance agents but will provide free, confidential and unbiased personalized assistance.

Contact your local Area Agency on Aging to schedule a personalized counseling session. For more information, call the toll-free PA MEDI Helpline at 1-800-783-7067 from 8 a.m. to 5 p.m. Monday through Friday.

PGC Seeks Help for Winter Turkey Survey

By Rep. Joe Emrick

The Pennsylvania Game Commission (PGC) is asking for the public's help finding turkey flocks to trap for ongoing projects. Pennsylvanians are encouraged to report the location of any turkey flocks they see across the state. Information is being collected online here through March 15.

Among other things, visitors to that webpage are asked to provide the date of the sighting, the location and the type of land (public, private or unknown) where birds are seen.

Trapping turkeys during winter is part of the commission's ongoing population monitoring, and it provides information for large-scale turkey studies.
