

## Looking Ahead to Sustain our Natural and Cultural Resources

By Sharon Davis, Delaware River Program Mgr.

National Parks Conservation Association

Dear Scenic Wild Delaware River Geotourism Program Stakeholder,

As a participating business, organization, place or event in Scenic Wild Delaware River (SWDR), you understand the value and benefits of protecting our natural and cultural resources from effects of air and water pollution and increasing climate impact. National Parks Conservation Association (NPCA) is informing you of this advocacy opportunity to show your support for clean air.

The U.S. Environmental Protection Agency (EPA) is currently in the process of reviewing once-a-decade regional haze plans from states around the country. Strong haze plans are critical to delivering clear skies and clean, healthy air to our most treasured national parks and wilderness areas. Strong state haze plans would not only benefit our public lands, they would ensure cleaner, healthier air to nearby communities and in turn, outdoor recreationists and businesses.

We are calling on the EPA to hold states accountable for many deeply flawed plans that do not make actual progress to reducing haze pollution.

Please join us in our efforts by signing your outdoor recreation business or sustainability minded company onto the following letter to the EPA. For more information on the regional haze rule, I have attached a fact sheet and am available to answer any questions you may have. Please sign by February 28, 2023, as we anticipate submitting in March.
