

WDIY's 'Teen Scientist' and Digital Strategy Win 2023 PA Broadcasters Awards

By WDIY

(Lehigh Valley, PA) – The Pennsylvania Association of Broadcasters (PAB) has announced that WDIY 88.1 FM, Lehigh Valley Public Radio, has won two 2023 Excellence in Broadcasting awards.

Outstanding Radio Public Affairs/Program Series Teen Scientist, Outstanding Use of Digital Media WDIY app and digital strategy.

The announcement came in late February as the PAB named winners in several different categories for radio and television stations in the Commonwealth.

Both of this year's awards are repeat wins for WDIY. Teen Scientist last picked up an Excellence in Broadcasting award in the "Outstanding Radio Public Affairs/Program Series" category in 2021, and the station's app also won in the "Outstanding Use of Digital Media" category in 2022.

The PAB's award ceremony will be held in Harrisburg at the Pennsylvania Ballroom at the Harrisburg Hilton on Friday, May 5.

A full list of the 2023 radio and television winners is available at the PAB website <https://pab.org/awards/>.

More Info About Teen Scientist

Teen Scientist is a monthly 30-minute public affairs program hosted by Moravian Academy student Rayna Malhotra ('24). Teen Scientist features one-on-one interviews focused on groundbreaking innovation in the science, technology, engineering, and mathematics disciplines—entirely from a teenage perspective.

Recent episodes of Teen Scientist have featured former NASA astronaut and fighter pilot Terry Hart, St. Jude Children's Research Hospital President and CEO Dr. James Downing, and the Coriell Institute for Medical Research President and CEO Dr. Jean-Pierre Issa. Teen Scientist began in 2019 hosted by Rayna's sister, Rhea Malhotra. Rayna took over hosting duties in 2020 when her sister graduated from Moravian Academy.

HOW TO MASTER YOUR BALANCE & STABILITY!

Join Robbins Rehab West in this FREE 30-minute interactive lunch & learn!

In this lunch & learn
Nick will cover:

- What contributes to balance problems.
