# Implementation of New Parks & Recreation Reservation System

By Brittney Waylen

County Executive Lamont G. McClure and the Division of Parks & Recreation have announced that as of Thursday, May 11, the new Northampton County Parks & Recreation reservation system has gone live.

The new user-friendly interface called RecDesk makes it easier to create an account, find an ideal location, and make payments to secure your reservation. Reservations for pavilions, tennis and pickleball courts, and campsites, all located within the county parks, will be the continued focus. However, programs offered by the Parks & Recreation Division or other partners will also be shown to help promote all events within the County.

The new website also offers a fresh, new look that complements all of the updates in our parks. The County will still provide the option to pay right when you make your reservation via online credit card payment or pay in person at one of the designated locations via cash or check. All previously made reservations are enrolled in the new system and are secured.

"We are very excited for this new system that will provide the public and county staff a more user friendly platform." commented Bryan Cope, Superintendent of Parks and Recreation, "It was a necessary upgrade which will reflect all of the recent projects in our parks to make them more enjoyable and accessible."

You can view the new reservation system by visiting the Northampton County website under the Public Works tab. ## What Items Do Not Go Into The Trash? WM Talking Trash

By WM

**SLATE BELT** - While some alkaline batteries are ok to dispose, we don't recommend it. We find that all types of batteries have the potential to connect with something in the trash and could cause a fire in our trucks or at our facilities. If you do put an alkaline battery or two in the trash – be sure to cover it with electrical tape. However, our recommendation is to encourage residents to recycle batteries at designated drop-off locations or participate in a buyback program.

What items do NOT go into the trash?

The following hazardous household waste items should NOT be treated as everyday garbage and should NOT be disposed of curbside, in your totes, bins or carts:

**Batteries**

**Electronics**

**Fluorescent light bulbs**

**Paint and paint cans**

**Used motor oil and filters**

**Prescription medications**

What items and materials are NOT recyclable?

Non-recyclable materials should be placed in your standard trash receptacles. Be certain that your trash cans, containers, bins or carts are not overloaded and that their lids can close all the way. Additional fees may apply for overfilled or contaminated containers.

Typically, items below cannot be recycled via curbside recycling programs. For more information on recyclable and non-recyclable materials, check out our Recycling 101 page.

Plastic bags (these can often be returned to a local grocery store)

Ceramic dishes, cups and glassware

Juice boxes/juice pouches

Foam cups or packing materials

Windows, mirrors, sheet glass
