Chronic Wasting Disease in Deer Informational Meeting

By State Rep. Joe Emrick

Residents are invited to attend an informational meeting about the new Disease Management Area 9, which covers parts of Pennsylvania's Northeast and Southeast regions. Game Commission staff will explain Chronic Wasting Disease's impact on deer and hunting, provide details about the disease management area, and discuss management strategies.

When: Thursday, Aug. 14, at 6 p.m.

Where: Copeechean Fish and Game Club, 5649 Brook Street, Schnecksville

PGC Seeks Help Counting Turkeys

By State Rep. Joe Emrick

The Pennsylvania Game Commission again is seeking input from the public in surveying wild turkeys this summer. The Pennsylvania Wild Turkey Sighting Survey is open now through Aug. 31.

Participation is important for turkey population management. Survey data allow the agency to determine total wild turkey productivity and compare long-term reproductive success within Pennsylvania and across states, as this is a standard methodology used across the country. Data also are used in the turkey population model to track population trends.

Turkey sightings can be reported through the Game Commission's website here. Participants are asked to record the number of wild turkeys they see, along with the county, township, wildlife management unit (WMU), date and contact information if agency biologists have any questions. Participants may also simply drop a "pin" on the map for the location data to automatically populate. Location data are used only for the survey, not for law enforcement and are not shared.
